* Outside Utility Agreement must be approved by City Manager prior to construction.
 Benton County encroachment permit required for street cut.
 \$ 0.00

Comments: In addition to these hookup fees, the owner is responsible for the cost of hiring a City licensed, bonded & insured contractor to install service lines and repair of the street. All work must be coordinated with City crews. Connections to the building(s) are made by the owner. Sewer lines must gravity flow into the City main. Sewer service lines must be inspected prior to cover. Proof that the septic tank has been pumped and filled (sand, slurry, gravel, etc.) is strongly recommended for future verification.

Division of the lot or multiple buildings could require additional connection fees or larger lines.
